Company Profile

SMART VISION
SOLUTIONS

حلول الرؤية الذكية

SMART VISION SOLUTIONS is a leading & up-to-date technology IoT & company, offering a unique package of technical solutions according to the best modern systems adapted to current and future business requirements.

ABOUT US

Smart Vision Solutions is a Saudi company specializing in providing integrated electrical & software solutions with modern technologies for enterprises, companies, & residential facilities. We offer a series of professionally integrated works stemming from our expertise, specialized team, & keeping pace with our partners' needs & the growing development in the field of technology. We provide software & IoT solutions, smart control systems, protection systems, & visual & electrical sound systems according to the highest quality that enables our customers to

At Smart Vision Solutions, We work through a team of experts, engineers, & specialists in our fields & have a clear development vision besides qualitative capabilities to achieve the interests of partners & respond quickly to their business requirements.

We continuously develop the capabilities of our team to stay up to date with the requirements of the labor market.

We work on the services of our customers with care & passion that exceeds their expectations to achieve their satisfaction & maintain a sustainable working relationship.

GOALS

- 01 Present innovative package of digital service with modern technologies, global quality, & competitive
- 02 Actively contributing to the growth of our partners' businesses, increasing their revenues, & improving their presence among competitors.
- 03 Continuous improvement of our tools, means, & business strategies to stay the preferred choice for our
- 04 Continuous development of the work team & attraction of the best experts to join our team.
- 05 Expansion of services & acquisition of greater market share.
- 06 Achieving the Vision 2030 in Business Development & Keeping Up with Transformation.

OUR VISION

Providing innovative solutions according to the best global digital technology in professional ways & support. This will help partners and customers keep pace with the evolution that adapts their needs and requirements & contributes to the improvement of their performance, sustainability, & development of their business.

OUR MESSAGE

The leading company & the first choice at the Kingdom & Gulf level in providing smart business services & solutions according to the best global systems.

OUR MISSION

Achieving Vision 2030 by responding to the digital transformation revolution & and technical development led by the Kingdom of Saudi Arabia. & upgrade the realities of our partners' business & contribute to providing a digital environment & modern support solutions to improve our position as a leader & optimal option for our current & future customers.

OUR VALUES

Quality

We believe in quality as an important value that we adhere to & invest all our energies to achieve it.

Innovation

We keep abreast of the latest technologies & provide innovative solutions that advance our partners' work in line with their requirements.

Permanent Development

We constantly develop our team & continually improve our tools & means to stay in the ranks of leading organizations based on science, experience, & skill.

Customer Satisfaction

We dedicate exceptional efforts to achieve customer & partner satisfaction.

Commitment

We offer better than our customers expect & commit to our commitments with our partners.

WHAT WE DO

The speed of response in the provision of services

We adopt international quality standards In all our work

Cost saving

Keeping up to date with the latest technology

Continuous follow-up 7/24

Passionate team to provide the best solutions

Comprehensive, integrated, & innovative support solutions

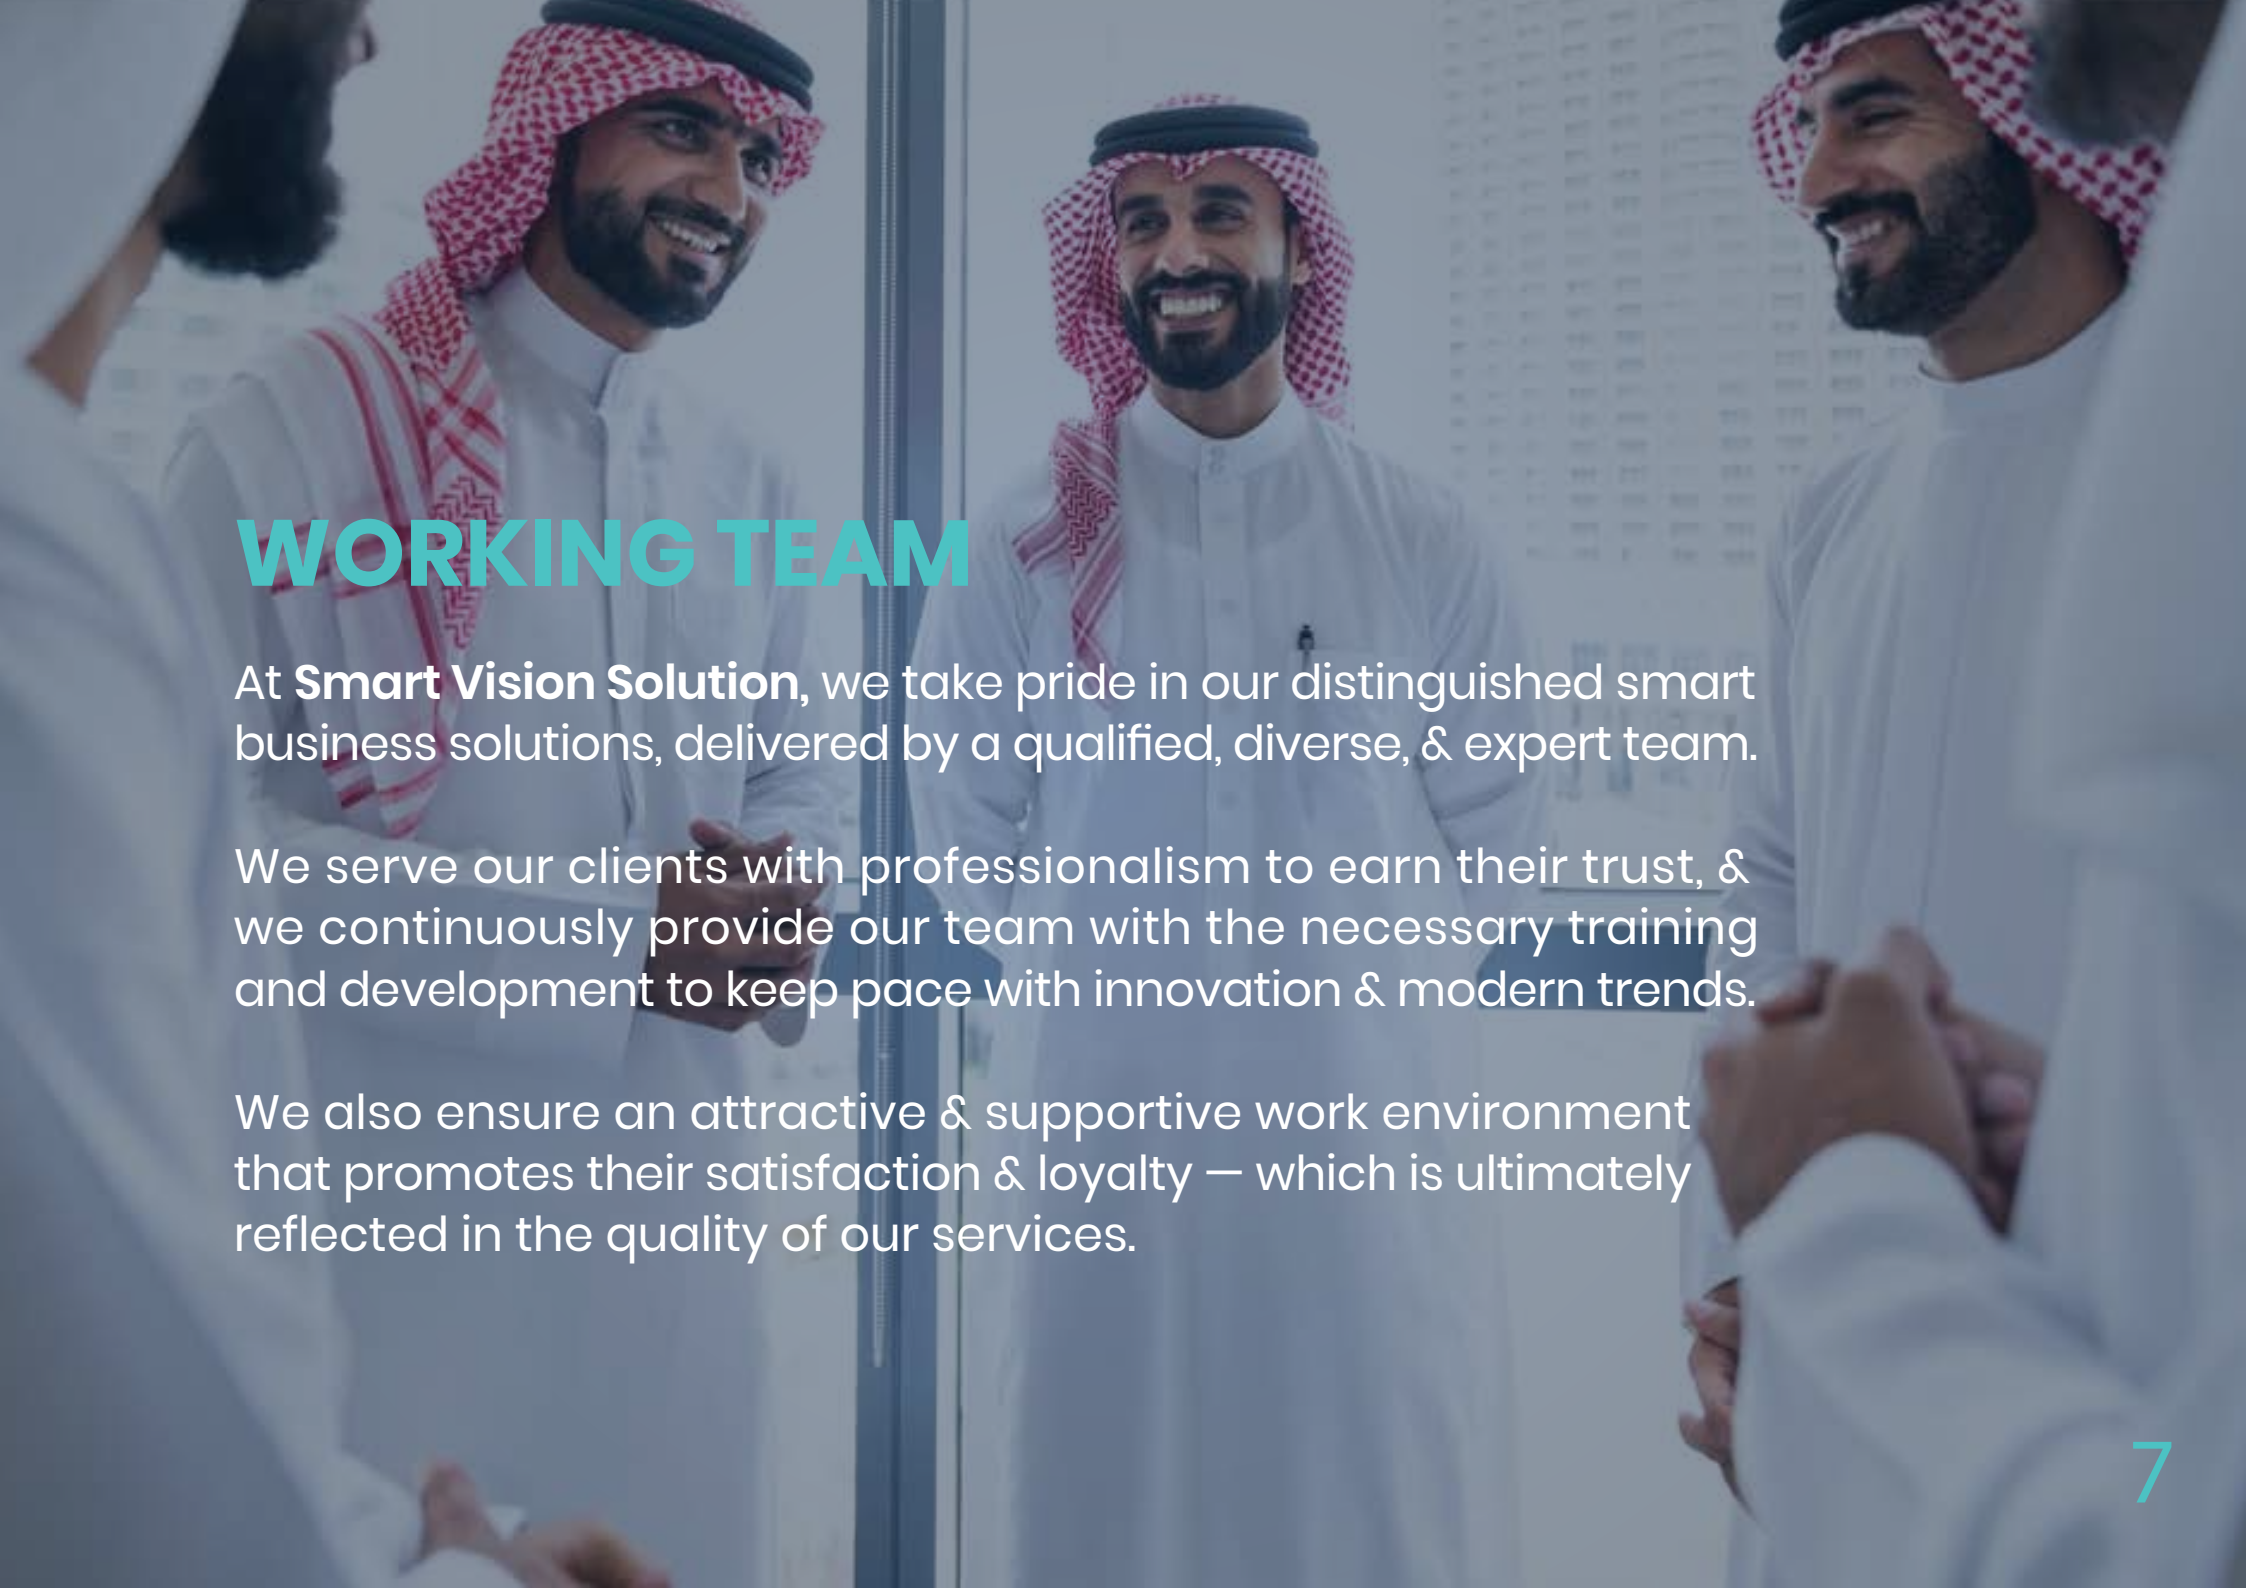

Consultancy aligns business requirements

Competitive prices

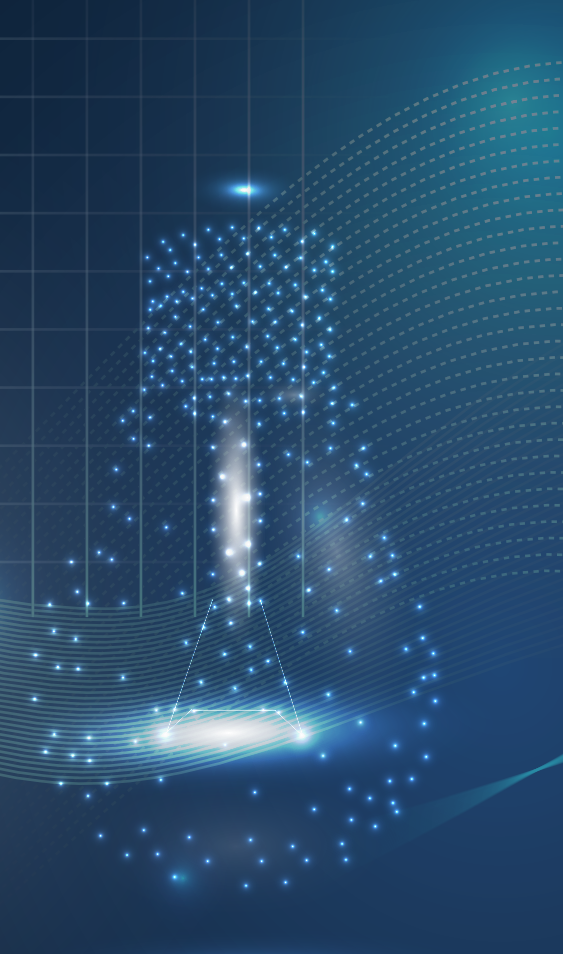

WORKING TEAM

At **Smart Vision Solution**, we take pride in our distinguished smart business solutions, delivered by a qualified, diverse, & expert team.

We serve our clients with professionalism to earn their trust, & we continuously provide our team with the necessary training and development to keep pace with innovation & modern trends.

We also ensure an attractive & supportive work environment that promotes their satisfaction & loyalty — which is ultimately reflected in the quality of our services.

OUR APPROACH

Experience

We have a wealth of accumulated experience in implementing & innovating top-tier solutions that contribute to the growth & development of our partners' businesses

Customization

We design both current and future workflows with professionalism and strategic foresight, minimizing the need for future modifications or additions

Cost-effective

We deliver optimal solutions to our customers, keeping project costs in mind to ensure maximum value

Knowledge Exchange

We provide high-quality training to our clients to ensure effective utilization of solutions & continue to offer technical support whenever needed

Pricing & RoI

We offer competitive pricing models that maximize return on investment & deliver the greatest possible benefit

OUR PARTNERS

- We cherish our partnership with respected international companies
- We offer end to end solutions to the public and private markets
- the quality of our external partnerships.

OUR PARTNERS

IoT-RFID SOLUTIONS

Radio Frequency Identification IoT-RFID is a technology that uses electromagnetic fields to automatically identify & track tags attached to objects. An RFID system consists of a tiny radio transponder called a tag, a radio receiver, & a transmitter.

When triggered by an electromagnetic interrogation pulse from a nearby RFID reader device, the tag transmits digital data, usually an identifying inventory number, back to the reader. This number can be used to track inventory goods.

IoT-RFID technology can be used across a wide range of departments and industries to improve efficiency, security, and data accuracy.

IoT-ESL SMART RETAIL SOLUTIONS

IoT ESL combines digital pricing displays with radio-frequency identification technology.

Each label wirelessly updates in real-time ensuring prices, promotions, & product information are always accurate without manual intervention

Imagine updating every price in your store in seconds – no paper, no labor, no errors.

Our advanced RFID ESL solution designed specifically to help supermarkets like yours boost efficiency, accuracy, & customer satisfaction.

Whether you're managing a supermarket, electronics store, pharmacy, or fashion outlet – one thing is universal in retail

RFID SMART TAGS

RFID (Radio Frequency Identification) tags are small electronic devices that store & transmit data wirelessly using radio waves.

Each tag contains a microchip for data storage & an antenna for communication with RFID readers.

These tags are used to identify, track, & manage objects or assets automatically, without requiring direct line-of-sight or manual scanning.

KEY BENEFITS OF RFID TAGS

- Real-Time Fast & Accurate Automation Tracking
- Improved Inventory Accuracy in bulk amount
- Faster Data Collection for high-volume
- Enhanced Security & Protection
- Automation & Efficiency to speed-up processes
- Durability & Reusability for Long-term
- Data Capacity Supports serialization for unique item-level tracking

Choosing best RFID tags for your application

WHERE WE CAN IMPLEMENT THE RFID SOLUTION

RFID APPLICATIONS FUNCTIONS

MANUAL & WITH RFID

Operational Challenge

- Manual data entry & barcode scanning
- Slow & inaccurate inventory counts
- Item loss or misplacement
- Lack of real-time inventory visibility
- Unauthorized item movement
- Time-consuming audits & compliance checks
- Scalability limitations in growing operations
- Lack of real-time inventory visibility

RFID-Based Solution

- Enables automatic, contactless identification without line-of-sight.
- Improves speed and accuracy instantly.
- Real-time tracking flags missing or unscanned items for quick action.
- Central dashboards show live item status, location, & movement logs.
- RFID tags trigger alerts for unpermitted or unscanned item movements.
- Full inventory audits completed in minutes using handheld or fixed RFID readers.
- Automated logging supports consistent control and reduces reliance on manual inputs.
- Systems scale easily with expanding facilities, inventory, or operational zones.

Installed Tags

RFID Count (1see)

Auto Count

<BEFOR>

✗ Paper labels → Staff manually change → Time delay
Errors & mismatched prices → Frustrated customers

<AFTER>

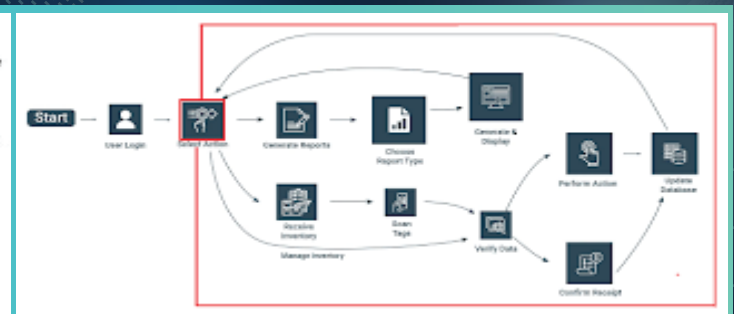

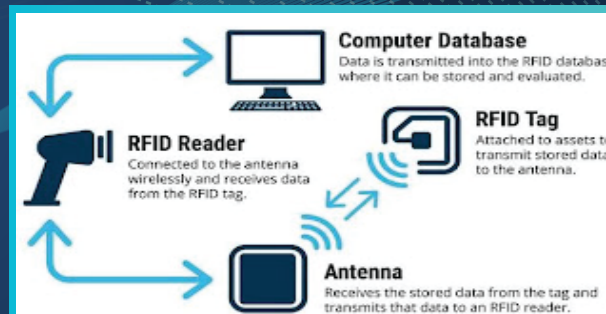

✓ Digital ESLs → Centralized undat → Instant pricing change
Accurate, synced prices → Satisfied customers

KEY SYSTEMS INTEGRATED WITH RFID SOFTWARE

- **Purpose** : Centralizes business processes, including inventory management, procurement, and financials.
- **Integration** : RFID software communicates with ERP systems to synchronize inventory data, update stock levels, & manage orders in real-time.
- **Examples** : SAP, Oracle, Koha, Microsoft Net, Microsoft Dynamics 365.

SEMIKOLEN SOLUTIONS

What is SEMIKOLEN?

Delivering comprehensive IT solutions and services that go beyond the conventional, fuelled by a relentless pursuit of excellence, innovation, & client-centricity.

Extends to empowering businesses through strategic guidance, adoption of cutting-edge technologies & proactive support.

We help you optimise your IT infrastructure, enhance security and unlock the full potential of data analytics.

Through continuous learning, collaboration, & ethical practices, foster enduring partnerships that are built on trust, integrity, and mutual success.

Offerings With more than 13 years of experience in the industry, portfolio of services span across a wide spectrum to include.

BRIGHT WIRES COMPANY LTD

What is BRIGHT WIRES COMPANY LTD?

Is the general marketing, products and services, Representative of many international vendors in Saudi Arabia, the Kingdom's leading provider of telecommunication, enterprise information technology & electrical solutions.

Bright Wires history in the Kingdom goes back to 1989, it was providing simple business of Electrical & Power systems.

Due to the rapid economic development in the Kingdom it has grown to offer a total enhanced portfolio of telecommunication, network, electrical products & services including consultation & implementation, business recovery & operations support.

IoT & AI SOLUTIONS

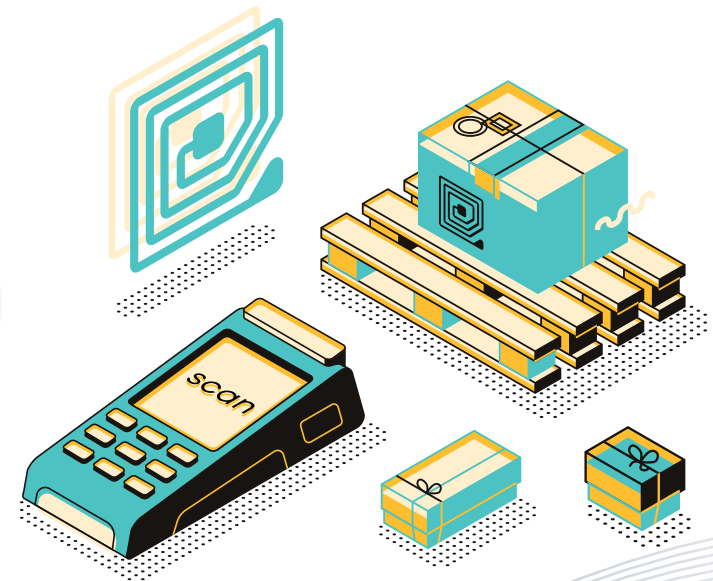

Our IOT & AI solutions harness smart devices and intelligent analytics to drive automation, improve efficiency, & enable predictive operations. from industrial automation to smart environments, we help clients transform data into strategic value.

IoT-RFID RADIO FREQUENCY IDENTIFICATION SOLUTIONS

We offer advanced RFID solutions for efficient asset tracking, inventory management, and access control. By automating data capture and enabling real-time monitoring, our RFID systems improve accuracy, reduce losses, & support seamless operational workflows.

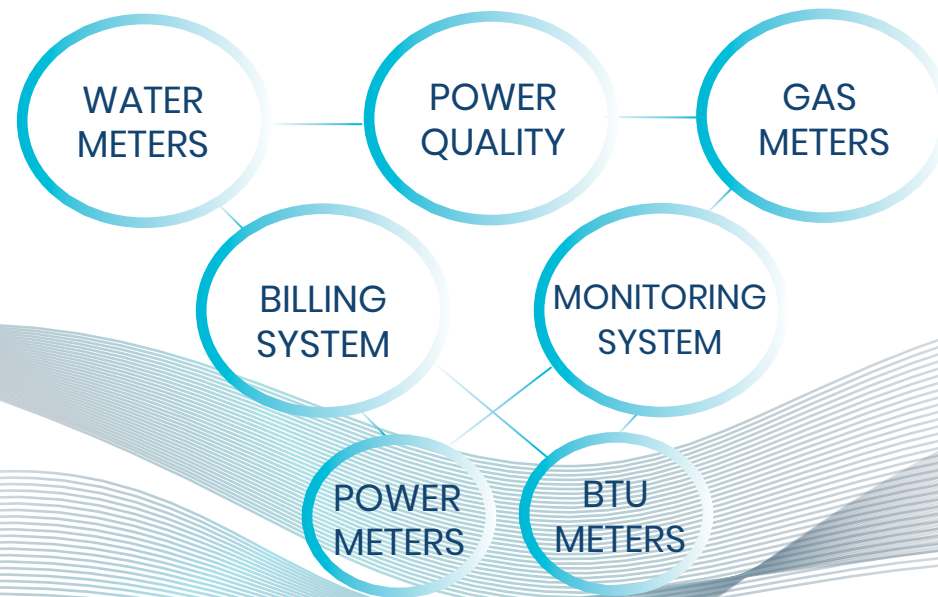

RFID
TECHNOLOGY

SMART METERING SOLUTIONS

Our smart metering solutions offer precise, real-time monitoring of utility consumption, including electricity, water, & gas leveraging advanced metering infrastructure (AMI) & IOT technology, we enable automated data collection, remote diagnostics, & detailed usage analytics. Integrated with smart billing systems, our solution ensures accurate invoicing supports flexible models (prepaid\postpaid), & provides end-users with real-time access to consumption & payment data. This not only improves revenue assurance for utility providers but also enhances transparency & customer satisfaction.

ADVANCED NETWORKING & IT INTEGRATION SOLUTIONS

We specialize in delivering robust IT & networking infrastructure solutions that ensure secure, high - performance and scalable connectivity across all business environments.

Our services cover the full spectrum from structured cabling wireless networks, & data centers to network security firewalls, & VPN configurations.

Through seamless system integration, we connect diverse technologies & platforms enabling centralized control, efficient communication, & unified operations.

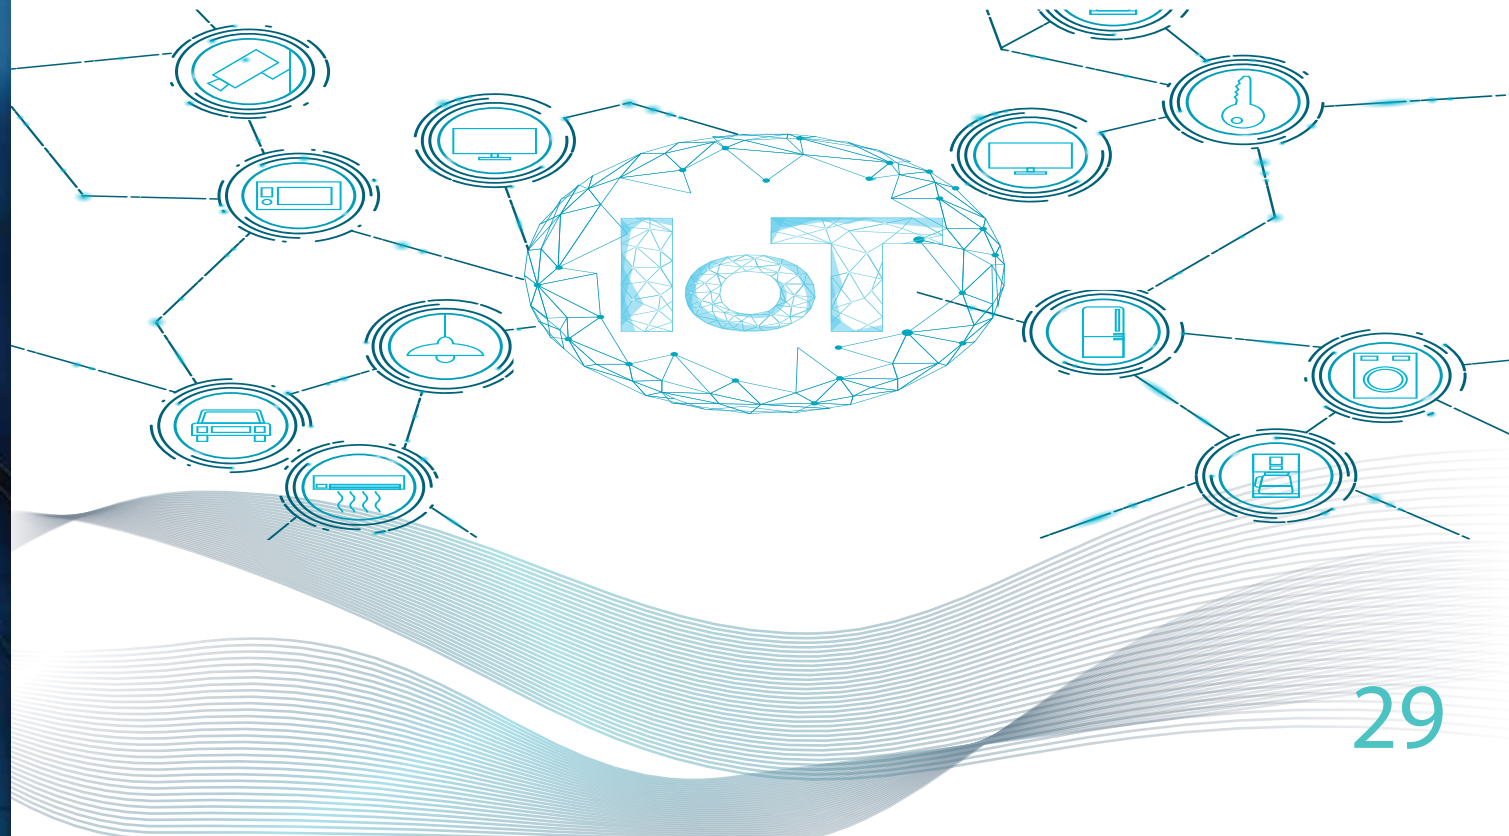

Our solutions are designed to support digital transformation, reduce complexity, & enhance overall IT performance.

MONITORING & TRACKING SOLUTIONS

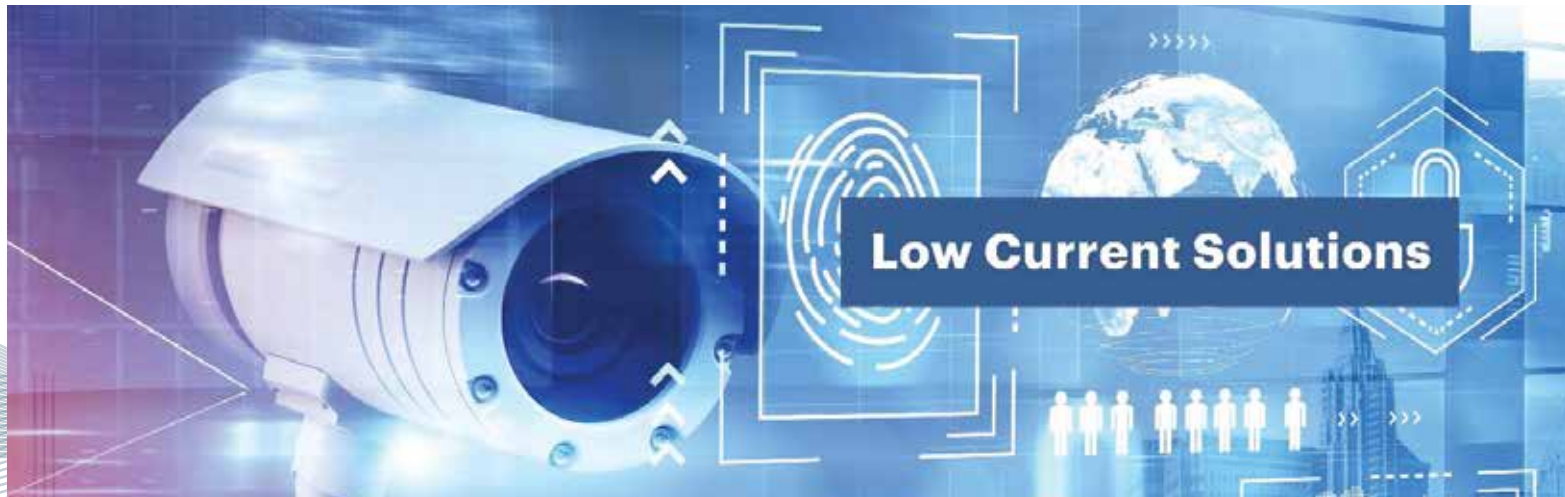

Our monitoring & tracking solutions enable real-time visibility into assets, personnel, & processes. Using GPS, RFID, and IOT technologies, We support efficient logistics, enhance security & improve operational decision-making through accurate actionable data.

LOW CURRENT SOLUTIONS

We provide comprehensive low current systems designed to support building safety, security, & communication needs.

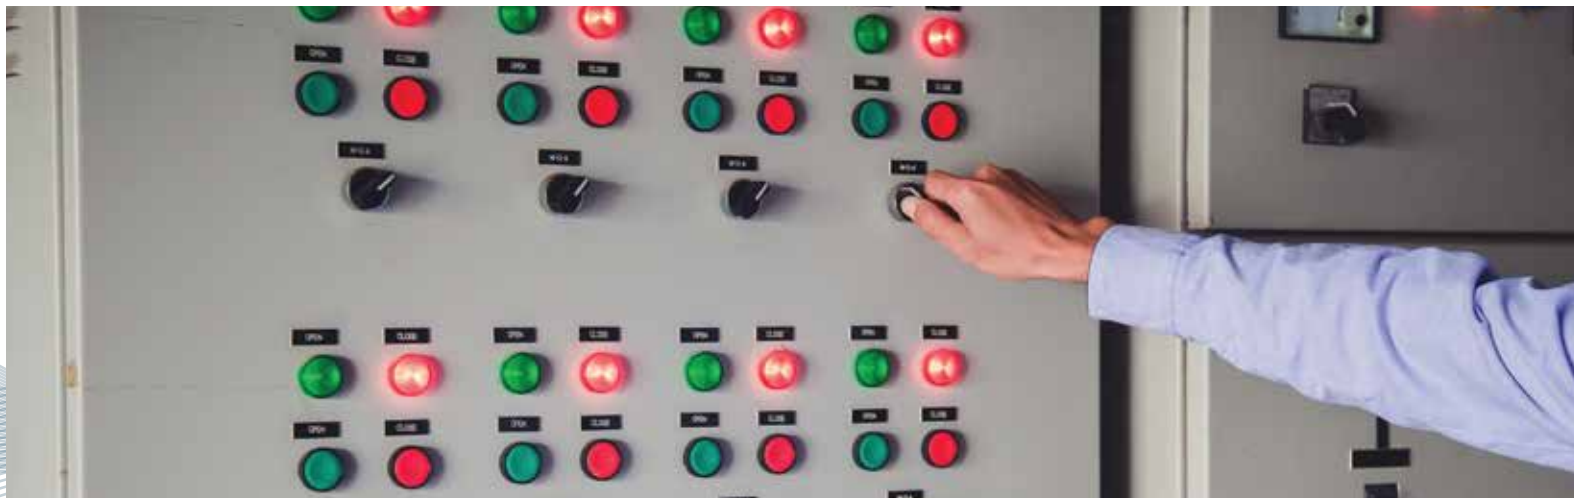

Our offerings include CCTV, access control, fire alarm systems, public address, & structured cabling – All engineered for reliability efficiency, & seamless intergration with existing infrastructure.

LOW VOLTAGE & CONTROL SOLUTIONS

Our low voltage & control solutions are built to optimize energy usage, streamline operations, & ensure safe electrical distribution.

From panel design to automation & control systems, we deliver scalable & cost effective solutions tailored to industrial, commercial, & residential applications.

A red fire extinguisher is mounted on a light-colored wall. The extinguisher has a black hose and a red handle. To the left of the extinguisher, there is a grey electrical control panel with several red buttons and a red fire alarm pull station.

OUR SERVICES

Supply and Installation of MEP (Mechanical, Electrical, & Plumbing)

Delivering comprehensive MEP design, implementation, & managements services tailored to meet the unique needs of commercial, residential, & industrial projects.

Firefighting & Fire Alarm Systems

Specialized in the design, installation, & maintenance of advanced firefighting and fire alarm solutions. we help safeguard live & prperty through early detection & repid response systems.

Integration Services

Our integration services seamlessly connect various buliding systems & technologies, efficient communication, centralized management,& optimized operational performance.

OUR SERVICES

Operation & Maintenance Service

Our operation & maintenance programs ensure optimal performance, longevity, & reliability of installed systems through proactive monitoring, timely servicing, & efficient troubleshooting.

Testing & Commissioning

We offer thorough testing and commissioning services to verify the performance, safety, & reliability of MEP & other building systems before project handover, ensuring full compliance with standards.

OUR PRODUCTS

Networking Products

We offer a wide range of high-quality networking products designed to provide reliable & efficient connectivity.

Our portfolio includes routers, switches, wireless access points, & network management tools from leading global brands, ensuring seamless data communication & network performance.

Low Voltage & Control Material

Our selection of low voltage & control materials covers everything needed for electrical & automation projects. From cables, connectors, circuit breakers, & control panels to sensors and actuators.

We provide durable & certified components that meet international standards.

OUR PRODUCTS

Smart Meetings

We supply cutting edge smart meeting room technologies & accessories to enhance collaboration and productivity.

Our offerings include wireless presentation devices, conferencing equipment, room control systems & all necessary peripherals designed to create a seamless, interactive meeting experience.

OUR PRODUCTS

Bright Wires

Bright Wires company Ltd Is the general marketing, products & services Representative of many international vendors in Saudi Arabia, the Kingdom's leading provider of telecommunication, enterprise information technology and electrical solutions.

Providing our partners with reliable, timely & cost effective of the latest technology of telecommunication, network and electrical products and services that exceed their expectations.

OUR CLIENTS

We provide our services to our customers in the local market by offering technical services and technical support in accordance with the latest findings of modern technology.

We strive to achieve a high level of satisfaction for them & ensure the sustainability of providing them with our quality services.
